DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after allowance or after an Office action under *Ex Parte Quayle*, 25 USPQ 74, 453 O.G. 213 (Comm'r Pat. 1935). Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, prosecution in this application has been reopened pursuant to 37 CFR 1.114. Applicant's submission filed on 1/28/2009 has been entered.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-6,10-16,18-20 are rejected under 35 U.S.C. 102(b) as being anticipated by Miyazaki JP 63057414.

Miyazaki discloses a transport device comprising:

- A flat transport element including a single flexible, bendable belt (4) and a drive (inherent from abstract)

- Wherein the single belt has opposite lateral sides and is substantially flat and thin between the opposite lateral sides thereof, and has a top side and a bottom side, there rollers (8,14) engaging the top and the bottom sides (fig.1)
- At least one basic carrier (2) including rollers (8,14) securely mounting the basic carrier in a predetermined position on the single belt (fig.1)
- At least one article carrier (28) mounted on the basic carrier and comprises a clip (32)
- A fastening (42) between the basic carrier and the article carrier
- Wherein the basic carrier comprises a basic body and at least two of the rollers that engage and roll on the single belt (fig.1)
- A clamping device (12,18)
- A pressing device (12,18)
- At least one stop (44) (fig.5)
- A plurality of the basic carriers (it is inherent that more than one basic carrier may be employed)

Allowable Subject Matter

4. Claims 7-9,17 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
